24th November 2006.

Dear John

Just a short note to let you know how good we think your INOX range of products are.

We have been using your products for many years now and have found their uses many and varied.

Our aircraft are between 40 and 70 years old and are maintained in an airworthy condition, your lubricating spray is great for all our general lubricating jobs, but is especially good for loosening corroded screws and nuts.

We found on our older English built aircraft that the hardware has never been a problem to remove because the RAF and RN always dipped the hardware in a lanolin based grease prior to fitting so, as a matter of course, we now use your lanolin based products on all our aircraft.

Regards

Peter Pring-Shambler
Chief Engineer
